Cash For Class, helping mold the future for amateur racing in the US

Our Second Annual Cash For Class is now scheduled on the AMA Featured Event Calendar for Nov 16-17 2020 and I can't wait to tell you of all the amazing things that have happened since our last event. For those of you that could not be present or did not already hear the event was a huge success! Riders and families from 6 states and three countries were in attendance and over \$9300 dollars in scholarship awards were given. Our system of transferring funds into the participants families very own 529 educational fund accounts was flawless and for the sponsors and donors to this tax deferred 501c3 account we owe all the thanks. You have opened a door to athletes and their families and provided a path for them to follow while helping their sons or daughters pursue their dreams. I would like to tell you a bit about what the AMA Featured Event Status means to this event. The American Motorcyclist Association sent representatives to the event and were immediately impressed with the concept and the facility. They quickly moved to help GPF and On Track School develop a path for future events by helping us form a Task force consisting of industry leaders that I am confident ,along with support of contributors and believers such as you will help us recognize Scholarship events as a major destination and most assuredly a way to promote higher education within the motorcycle community.GPF is proud to be able to promote and develop the Cash For Class events and look forward to working with other promoters as we expand scholarship race events to other venues throughout the country. Our goals for GPF's coming event is to give you, our first supporters, even more opportunity to advertise within the event and provide you with many more options including much better signage at the event, more social media exposure, our partnership with the AMA has helped us develop a Task Force consisting of Industry leaders and professionals dedicated to expanding the scholarship race vision. This will give us many different avenues of advertisement as they help us get the word to so many people about this great event and the supporters such as you that have made it possible. The following is a list of advertising opportunities at the GPF race facility that we wanted you to have the first opportunity to take advantage of although some of these locations are still under construction and lighting is still to be installed, I think you will get the idea. The best part about these opportunities is that all you have to do is decide how much space you would like and supply us with your artwork. We will build your banners and place them in the locations you select..
